

Indian Association of Cardiovascular-Thoracic Surgeons

invites you for

HYBRID THORACIC CME

20-21 November '2021
Saturday-Sunday

Radisson Blu
Sector-13, Dwarka, New Delhi

:: Special Attraction ::
Wet Lab and VATS Simulator

Dear Colleagues,

Greetings from Delhi!

So finally, after a gap of one year, I am reaching out to all of you. Past one and half year have been a huge disruption in everyone's life, both personally and professionally. However, as the pressure of pandemic lessens, and more is known about this hitherto unknown disease, life is limping back to normal.

Medical science is an ever-evolving and continuous learning process for all of us. Pandemic failed to dampen this quest for learning. Virtual education became new norm. Exchange of ideas and sharing knowledge and experience became easier than ever before across the globe.

Thoracic CME is an endeavour to initiate young cardiothoracic surgeon into this specialty. There is huge gap in supply and demand of dedicated thoracic surgeons. Fortunately, unlike heart, lung is a very forgiving organ. And this translates into patients having ample time to reach a dedicated thoracic surgery facility. In India, there is renewed and increasing interest in this specialty. This year's Thoracic CME will focus on "Basics and Beyond". Topics have been carefully chosen to encompass common general thoracic problems amenable to surgery. Faculty comprises of distinguished & dedicated thoracic surgeons from India and abroad. There is generous sprinkling of current advances in minimally invasive thoracic surgery as well.

I invite all young cardiothoracic surgeons and postgraduate students to participate actively in this scientific feast and broaden their horizon.

Welcome all.
